

Institutions are reminded that, regardless of delivery modalities or formats, all academic programs offered by NYS degree-

As highlighted in last month's OHE Newsletter, Teaching in Remote/Hybrid Learning Environments (TRLE) is a federally funded program to increase the capacity of educators in New York State to improve remote/hybrid instruction. The initial goal of TRLE is rapid deployment of professional learning to the field. Our 14 Level 1 Center partners (including the state's 12 Regional Information Centers, the New York City Department of Education, and Yonkers City School District) are responsible for providing all New York State educators with training and support on the [six core competencies](#) identified in the grant.

We are excited to report that Level 1 Centers have begun training educators throughout New York. A [calendar of professional learning experiences \(PLEs\)](#) can be found on the [TRLE website](#). The PLEs are available to New York State educators at no cost. A registration link is included in each of the events on the calendar. Please contact us at rethink@nysed.gov if you have questions regarding registration.

Professional learning is at the heart of TRLE. Over the next couple of years, the goals of the program will focus on creating a Quality Remote/Hybrid Teaching Framework and thousands of hours of professional learning and services. TRLE will also partner with institutions of higher education to connect lessons learned to pre-service and in-service educator supports. To keep up-to-date with TRLE, please sign up for our listserv on the right side of our [TRLE website homepage](#).
