Special Education Field Advisory

From: James P. DeLorenzo

Subject: Guidance for the Transition to Unified English Braille (UEB)

The purpose of this memorandum is to provide information to school personnel regarding their responsibilities for preparing students who are learning American Edition (EBAE) to transition to Unified English Braille (UEB) "as soon as possible" as well as to provide resources for teachers for professional development. It is anticipated that as soon as possible during the 2015-16 school year, instruction in English, mathematics, science and technical subjects should be continued.

In 2012, the Braille Authority of North America (BANA) voted to adopt UEB to replace EBAE in the United States, effective January 1, 2013. This project, which began the development of UEB in 1994, is now being implemented worldwide. As of this "effective" date, UEB, Notational music, International Phonetic Alphabet (IPA) will be the official braille codes for use in the United States. Materials that have been produced in other braille codes prior to the 2013 UEB implementation date will remain in circulation.

For many individuals who are blind but reading printed, printed electronic and digital documents, the development of the new standards, protocols and training materials for family members of individuals who read braille will need to learn UEB or update their knowledge of braille to include the rules governing UEB. The main aspects of literacy that will be impacted by the change in UEB, resources to facilitate the transition to UEB, and implications for the production of materials in UEB to ensure that students receive adequate instruction in the new code are summarized below.

State assessments administered during the 2015-16 school year will continue to be provided in the EBAE format for individuals who are blind or visually impaired. In addition, NYSED is currently developing a transition plan for state assessments in UEB. In consultation with stakeholders, to ensure that assessments are appropriately aligned with instruction for students with disabilities who may be impacted by this transition. Guidance

prior notice will be provided to the Commissioner of Education in accordance with the UFR format.

Summary of Changes to the UEB

UEB is based on current literary braille, which is the standard literary braille used internationally; is designed to be more "compatible" (i.e., easier to translate electronically), less ambiguous (i.e., with fewer exceptions and rules); and includes "standardized punctuation materials". This new code will standardize the codes used by other countries for technical and English Braille. The New York State Education Department has agreed to adopt the UEB. The form by DANATC continue to use the Nemeth Code. NY will continue to use Nemeth Code. Braille and the International Phonetic Alphabet (IPA). Information about the Unified English literary braille in UEB will retain many of the same basic structures as EBAF. Below are identified changes to the following aspects of braille code.

- Elimination of and changes to ~~abbreviations, contractions,~~
- Changes to ~~publications, currency symbols,~~
- Spacing;
- Period, decimal, dot and ellipsis;
- Capitalization;
- Italics, bold and ~~underline~~;
- Numbers;
- Web and email addresses; file names and file numbers;
- Accents; and
- Formating.

More detailed information on these changes can be found at <http://www.brailleauthority.org/ueb/3version/> or <http://www.brailleauthority.org/ueb/>.

Training Resources

School districts, Boards of Cooperative Educational Services, private foundations, private schools, state-supported schools and other agencies involved in education are accessing training resources for their teachers of students who are blind or visually impaired as soon as possible. Teachers of the blind and visually impaired and other relevant staff will need to be trained prior to the start of the school year to attend training sessions on UEB. The following list includes some of the UEB training and resources for teachers, parents and caretakers, as well as library resources available online.

~~NYSED will provide information about training opportunities as they become available.~~

Instructional Materials in UEB Format

The transition to UEB affects the production of instructional materials, equipment and software. The American Printing House for the Blind, Inc. (APH) has released its position statement on the production of braille materials in UEB which can be accessed at <http://www.aph.org/or/20140724Policies-Regarding-UEB-Transition-at-APH.html>. Schools that order materials from APH will "need to be aware of their production timeline. The vendor who produces tactile characters that are accessed by districts through the Department Center for the Visually Impaired (DCVI) is prepared to supply materials in UEB beginning in January 2016. There are significant challenges in the transition to UEB. To supply braille materials for students when accessing materials through these entities, districts may need to specify that preprinted braille codes for certain items, such as above, materials that have been produced in other braille orders prior to the 2016 UEB implementation date will remain in circulation..

Questions regarding this memorandum may be directed to the Special Education Policy Unit at 518-473-2857. The memo is intended for all personnel within a school district, Board of Cooperative Educational Services, and other organizations such as Directors of Special Education, School Psychologists, Coordinators of Special Education, and Superintendents. It is also intended for the Special Education Association.
